Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2, 4, 6-7 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by DD '209, newly cited by applicant. The lead end attaching device of DD '209 includes a primary nip formed by belt member 17 and a secondary nip formed by member 2 which travels from a first position adjoining the primary nip on the outfeed side to a second position adjoining the primary nip on the infeed side.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5, 8, 10 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over DD '209. It would have been obvious to one of ordinary skill in the art that the secondary nip of DD '209 could be eliminated during unwinding, re claims 5 and 10, if not already so, since the secondary nip would have been no longer needed once the material wraps around the take-up a number of times. Regarding claim 8 the rotating angle of the secondary nip of DD '209 appears to be close to 270 degrees around the winding axis. In any event it would have been obvious to

Art Unit: 3654

one of ordinary skill in the art that such angle could have been used depending on where the secondary nip is formed relative to the first nip, e.g. closer to the nip or farther away therefrom. Re claim 12 it would have been obvious to one of ordinary skill in the art to only contact the edges of the web in DD '209 depending on the type of material being wound, for instance, photosensitive material, to prevent damage to the material as is old and well known in the web handling arts.

Allowable Subject Matter

5. Claims 13-23 are allowed.
6. Claims 3 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
